TROYER Design COMPANY

2024

Our goal at **Troyer Design Company** *is to build high quality dining room furniture. We add interlocking glue joints on our 1 1/2" – 1 3/4" solid tops (with and without live edge), shown on page 58. All of our live edge tops are assembled in our shop. Any solid tops that are thicker than 1½" include a v-stabilizer bar, shown on page 3.*

WE BUILD CUSTOM SIZES & PIECES including:

Decorative Beams | Wooden Countertops | Tables | Coffee Tables | Stands
Open Shelving | Benches | End Tables | Bed Frames | Sliding Barn Doors | Fireplace Mantles
Stair Treads | Hall Trees | Magazine Racks | Serving Trays ...and Much More!

Your business is appreciated and we look forward to working with you soon!

Wood is a natural commodity and, consequently, may act in ways outside our control. Every piece of wood has unique characteristics and variations, giving each piece of furniture a distinctive look. The building process may be the same, but each item is, (like a fingerprint,) one-of-a-kind.

All knots on rustic furniture will be filled unless there is a request for open knots. All furniture is available in our standard species. Call for other species.

The open grain of most hardwoods will result in some expanding and contracting upon exposure to changes in temperature as well as humidity, even with a protective finish. These fluxuations may cause the wood to crack or have surface checks. This is a normal reaction and is not considered a flaw.

To minimize its effects of on hardwood furniture, humidity should be in the 35-40% range. Heating/cooling effects on wood can be controlled by keeping it away from any source of heating/cooling. NOTE: Do not store in attic/basement or in direct sunlight/fluorescent light.

TROYER Design COMPANY

It's all in the DETAILS...

Troyer Design Company is about both "design" and "detail."

We INVITE you to look at the DETAILS!

Our tables with 1½" - 1¾" solid tops have an interlocking glue joint providing a stronger table top.

Live Edge – every piece has its own natural/unique look.

V-Stabilizer bar on all solid tops 1½" and thicker.

Get that rustic look and feel with our Rough Sawn Rustic (real saw marks) – available on most furniture. Our Rough Sawn species are Red Oak and Brown Maple.

We use very high quality wooden table slides on our leaf tables that slide easier than any other wooden slide on the market.

Standard wood species: Rustic Oak, Rustic Cherry, Wormy Maple, Oak, Sap Cherry, Rustic Hickory, Brown Maple, Cherry, Hickory, Elm, Rustic QSWO, Rustic Walnut, QSWO, White Oak, Rustic White Oak.
(Contact us for other wood species availability.)

Live Edge species: Rustic Red Oak, Red Oak, Rustic Cherry, Cherry, Wormy Maple, Rustic Hickory, Hickory, Brown Maple, Rustic Walnut, and Rustic White Oak.

Most furniture is available in Rough Sawn Rustic (real saw marks) or Non-Rustic.

We build custom pieces and sizes, call for prices.

Epoxy River Run tables available.

48" wide tables available.

Ordering Information

This catalog offers our standard features, but we will also build custom tables to fit your needs. Levelers are standard on all trestle and pedestal bases. Tack glides are standard on leg tables and benches.

The following information is needed to complete your order. Please specify unless standard.

- Table Description
- Size/Dimensions
- Number of Leaves or Solid Top
- Table Top Shape
- Edge Style
- Wood Specie
- Top Thickness (1", 1¼", 1½", 1¾")
- Live Edge
- Rough Sawn

NOTE: Live edge leaf tables will have a live edge on both ends of the table.

Troyer Design Company has unlimited slabs available, with many sizes to choose from. We cut all our Live Edge slabs with our own 70 inch saw mill. (Sometimes we get logs in that are wider than our saw mill can cut.) We also kiln dry ALL our own slabs.

See page 51 for slab sizes.

TROYER Design COMPANY

Need a special *Live Edge*? Troyer Design Company will glue up Live Edge slabs to any length and width. If you need a table top, bar top, counter top, coffee table top or open shelves built to your specific size, just give us a call.

We also offer "pour over" epoxy on tables. It's GREAT on rough sawn tables... the saw marks are there, but the table top is PERFECTLY smooth!

The special "bark on" Live Edge can only be done with our "pour over" epoxy process. This keeps the texture and integrity of natural bark, but creates a clean stable edge for a table that is truly a one-of-a-kind work of art.

Check out page 51 to see our steel bases and solid tops. Most of our tables shown in this catalog are available with Live Edge and with all our standard wood species.

We LOVE to bring the Beauty of Nature into Your Home!
